President's Report
by MARK CARUSO

Help the UAW by Getting Involved

We have a full plate ahead of us, with the JCI contract and the transfers to other Ford facilities. Currently we are patiently waiting for JCI to return to the bargaining table as they negotiate product pricing with Ford Motor Company.

The state of the economy has led to a lot of uncertainty for us in the auto industry. We need to be proactive in selling our own product by offering our vehicle discount to our families and friends, preferably for Ford vehicles made in America. To find out more about union-built autos and trucks, please visit http://www.uaw.org/uawmade/index.cfm.

As Saline continues to hire a new generation of Visteon employees, we, the seniority members, need to educate, support and safeguard the new employees by giving them good direction. Providing quality workmanship and working safely are the keys necessary to market UAW labor as the best workforce in the world!

Unions are under attack from all directions and in this day and age the drive to slash benefits and wages is running rampant. It’s unfortunate that the corporate think-tank has yet to learn that if all the good-paying jobs are sent overseas, who will be left to buy their products? Compound this problem with the right wing nitwits in Washington and we are on an economic crash course.

Our only hope is to be more involved with government politics.

"In Solidarity,
Mark Caruso, President / UAW Local 892"
Membership Continues to Decrease

There is a lot of activity going on in the auto industry today and the Saline Plant is no exception. We are seeing our UAW/Ford employee membership continue to decrease. So far this year we have had 78 members sign up to take a separation (buy out) package. 304 Saline members signed up to return to Ford Plants, with an additional 20 signing up to transfer to Kansas City Assembly with the U377 (Escape) IP. We continue to bring in new UAW/Visteon members so, as you can imagine, there is a lot of “churning” going on.

Negotiations with Johnson Controls have been on hold for a few weeks now while they iron out issues with Ford Motor Co. So far this year we have had 78 membership continue to decrease. Seeing our UAW/Ford employee Plant is no exception, we are losing members so, as you can imagine, there is a lot of activity going on in the auto industry today. There is a lot of activity going on in the auto industry today. See our new UAW/Visteon Assembly with the U377 (Escape) IP. We continue to bring in new UAW/Visteon members so, as you can imagine, there is a lot of “churning” going on. Negotiations with Johnson Controls have been on hold for a few weeks now while they iron out issues with Ford Motor Co.

We have been officially notified by the company that the “2008” Summer Shutdown is scheduled for the weeks of 7/7/08 and 7/14/08. I’d like to remind all the UAW/Ford members that if you are taking a buy out package, use your two “family days” and also take advantage of any dental and/or vision coverage that you may need.

If you are leaving Saline to go to another plant, go to the Local 892 Union Hall and get your transfer card so that you won’t be required to pay initiation dues again at your new Local Union. Region 1A has requested assistance of all Locals on a volunteer basis to participate during the American Axle strike. We expect this to be a long and drawn-out strike. Everyone must fight to protect these good-paying Union jobs and our Brothers and Sisters.

In Solidarity,

Pete Graham

Great Job, Saline Plant

Ford’s system that tracks and reports data from our production and service parts is called an SIM (Supplier Improvement Metrics) score. The year ended in November of 2007 and Saline’s SIM score was an all-time high with 1450 points. This score was the highest in all of the ACH plants.

Our SIM score objective for 2008 started in December and is set at 1200 points. Our actual points at this time are 1250. This score is well above the minimum 800 points required to maintain our Q1 rating out of a possible 1600 points you can have.

QRs (quality rejects) are a collection of specific details related to a concern or a QR written against a shipment rejected by a production plant. Saline ended 2007 with 809 QRs; much of this was due to all the churning that took place. For the month of February, Saline was responsible for 26 QRs, the suppliers had 29. For the month of March, Saline was responsible for 33 QRs and the suppliers had 47.

Some key elements to remember about quality are that our vision to be the world’s leading supplier of integrated automotive systems drives us to continually improve the way we plan and the way we run and change our business. Quality leadership gives this plant the opportunity to retain and grow our business. Quality is everyone’s responsibility, from the operator to management, from suppliers to facilities.

Operator quality responsibilities are a daily focus on quality, produce standardized quality work, follow the reaction plan to contain defects and understand the quality operating system elements for individual jobs or workstations.

Keep up the great job, Saline, and continue building quality into our products.

In Solidarity,

Jeri Feeman

Team on Task

We have been focusing on the Saline Plant M.E.E.T. Program (Mind on task; Eyes on task; Effort on task; Team on task). This month, our focus is on the “Team” it takes to maintain a safe plant and to meet the goal of “Employees going home healthy each and every day.”

The “Team” on task concept means we are working toward a common goal. In our case it is to produce a quality product and maintain a healthy and safe workplace. The “Team” must consist of all of us, as failure to do so will result in injuries that could have been prevented.

What does it mean to be a “Team?” During the recent insurance audit at Saline, the auditor found a major non-conformance issue. He discovered smoking was going on in the warehouse and on the roof. Areas that could put all of our jobs at risk if a fire started and went out of control. Everyone should be aware that we have a county ordinance and plant policy against smoking inside the building and covered walkways. Smoking violations will result in discipline up to and including discharge. We must all keep our building and contents safe.

People have asked what are other examples where not thinking like a “Team” can cause injuries. Food and drinks being spilled on floors and steps. Slips and falls occur as the mess was not cleaned up and left for someone else to find or take care of. Others have been hurt when operators have failed to secure panels in

Smoking violations will result in discipline up to and including discharge.

installed passenger seat is provided for company business.
12. Do not remove or tamper with machine guarding or other safety devices.

WE NEED TO KEEP SAFETY AT THE FOREFRONT OF OUR THINKING

We don’t always agree with everything that goes on in our workplace. Some people don’t believe that the company or in some cases the UAW has our best interest or safety in mind when making changes, rebalancing lines, and setting up areas. Our plant is changing on a fast pace and so is the auto business but one thing will remain, we will continue to be the most safety conscious plant in the business.

The Saline Plant UAW Safety Representatives will continue to do what we believe is the right thing with safety at the forefront of our thinking. Whether it is an hourly person on a line, driving a fork lift, a Skilled Trade’s person performing a task, a supervisor, an engineer, or the Plant Manager, we will continue to do the right thing with everyone’s safety in mind. There are times when it may not be the most popular outcome to some hourly people or company people but it will be the right outcome based on what is safe and what is not.

With the focus being on Energy Control & Power Lockout (ECPL) and Powered Material Handling Vehicles (PMHV), we will continue to present safety in a professional and to the point method. We need to keep our eyes on such safety issues as wearing our safety glasses with side shields, Kevlar arm guards and gloves when required, safety harnesses when required, use of proper shipping and receiving dock procedures, using pedestrian doors and not overhead vehicle doors when entering warehouses. We need to use pedestrian walkways as marked, the use of cells phones and other electronic devices need to be used in designated areas only. Drivers of powered vehicles as well as bicycles need to use the proper aisles ways, stop at all stop signs, use your horn at intersections, and watch for pedestrians. Pedestrians, on the other hand, need to look out for vehicles and give our drivers consideration. Pedestrians need to make eye contact with vehicle drivers before crossing aisles ways and intersections. Limiting vehicle movement to job-related task traffic cuts down on the chance of accidents and incidents with vehicles and or pedestrians.

We also need to use approved safety knives only, band loose dunge age, and do not store anything on corners higher than 4 feet. Smoking is one of the main issues we are experiencing in our plant. We have people smoking in areas that are not only against plant and county policies but we are finding people smoking in areas that are very dangerous to the welfare of our employees and our plant in general. We have people smoking in warehouses, paint areas, and other parts of the plant that are not only designated no smoking areas but also dangerous practices because of the flammable and/or combustible materials that are stored in these areas.

Throughout the thirty-one years I have worked in the Saline Plant, I have seen many changes to this plant and most for the good. At no time have I seen more changes than what we are experiencing right now. Although some people believe that safety is taking a back seat to changes, that is not true. The UAW Safety Representatives are working to make these changes as safe as possible. I personally will continue to work to maintain our plant at the level we are accustomed to until I am asked to leave.
Come along with us for family fun at Cedar Point.

Your leadership has negotiated a HUGE DISCOUNT for its members. Be sure to take advantage of this limited offer.

UAW LOCAL 892

APRIL / MAY 2008
PAYMENT of tuition and compulsory fees for approved college credits (ETAP, RETAP, SETAP, NVRAP) is available to active UAW-Ford members and UAW-Ford employees on an indefinite layoff or on an indefinite leave of absence. The ETAP (Education & Training Assistance Plan) still remains an educational option for you to pursue while you are working.

Whether you are on the active rolls, retired or on an indefinite layoff, meeting certain guidelines, you can continue to access the EDTP site for all your personal information / records / online applications by going to: www.MYUAWFord.com. Here are some basic highlights of the program:

ETAP (Education & Training Assistance Plan) provides for PRE-PAYMENT of tuition and compulsory fees for approved college credits or degrees at regionally or nationally accredited degree granting educational institutions. Program monetary maximum is $4,600 annually.

The ETAP plan allows for participants to utilize $150 of their $4,600 allocation for book reimbursements for approved, credited courses. Reimbursement forms and receipts must be submitted to the NPC.

NVRAP (National Vocational Retraining Assistance Plan) - The NVRAP feature of the plan provides employees on an indefinite layoff ETAP benefits as long as they meet the program eligibility: possess one year of seniority as of the last day worked and retain recall rights.

THE TOTAL MAXIMUM AMOUNT IS BASED ON THE EMPLOYEE’S YEARS OF SENIORITY:
$6,400 1 TO 3 YEARS
$7,400 3 TO 4 YEARS
$8,400 4 OR MORE YEARS.

RETAP (Retiree Education & Training Assistance Plan) - **The RETAP feature of the plan covers both ETAP courses held on-site at any plant, Local Union Hall, or other approved local program delivery sites. ($1,500 annually).

If both the Ford facility and the Local Union Hall are closed and no other UAW-Ford represented locations exist in the area, retirees may attend classes at a college or university approved by the NPC (National Program Center).

SETAP (Survivor Education & Training Assistance Plan) - **The spouse and dependent child(ren) of an employee who dies while on the active role are entitled to utilize the remaining balance up to $4,600 of the employee’s tuition assistance eligibility, excluding any advance payment, for college or educational pursuits during a period equal to the length of present agreement following the date of the employee’s death.

OR **The spouse and dependent child(ren) of an employee who dies while on the active rolls in a work-related incident are entitled to utilize the remaining balance of the employee’s tuition assistance eligibility, plus three additional years tuition assistance eligibility, for college or educational pursuits during a period equal to the length of the present Agreement following the date of the employee’s death.

www.MYUAWFord.com

Please contact the National Program Center at 1-800-FORD-UAW if you would like to change or cancel an application that has already been processed.

My journey here in Saline has now come to an end. I myself will be going back to AAI (Flat Rock). It has been an honor to be a part of this Local 892 over the past eight years and to have served the membership and helped to welcome all of our newly hired and transferred Union brothers and sisters here to Saline.

Life is a journey and many roads are traveled, many memories are made along the way. I wish each and every one of you all the best in life and may all of your futures hold the promise of a better tomorrow. To the newly transferred & hired brothers and sisters of this great UAW Local 892, I hope that YOU, the UNION, continue to carry the torch of Union activism and fight for the rights of the working class.

Stay UNITED — That is Your STRENGTH!!
Build World Class QUALITY — That is Your FUTURE!!
WORK SAFELY in all that YOU Do for SAFETY IS YOUR LIFE!!
May God bless each and every one of you!!

Pension Benefit Increase Effective October 1, 2007 for UAW-Ford Retirees and Surviving Spouses

Purpose of Communication

We are pleased to announce that you will be receiving an increase to your monthly pension Life Income Benefit. The increase is effective October 1, 2007 and is a result of the 2007 Collective Bargaining Agreement. Your initial adjustment will be calculated retroactive to October 1, 2007. The amount will vary by individual, and is based on your credited years of service.

What You Need to Do

No action is required. Your monthly pension increase will be adjusted automatically. We are working with the Pension Department to process most increases and retroactive adjustments for the May 1, 2008 pension check, but some adjustments will occur one month later - June 1st.

UAW-Ford Negotiations Benefit Changes

Benefit plan information is now available online at www.benefitcompanion.com. You will be asked to insert a company name and password; for company name use uawford and for the password use myhealth.

The Low-Down on Butter Substitutes

Butter substitutes will definitely save you a calorie, which is the main reason people opt for them, but will it cut it as far as taste? Surprisingly, the imposters use ingredients such as olive oil and yogurt that create a creamy illusion that will even please butter lovers. According to Women’s Health the top 5 knockoffs are:

1. Smart Balance Omega Plus Butter Spread – This is the closest thing to actual butter. It is made with cholesterol-lowering plant sterols, which could help your levels drop 5 to 10 percent, says Robert Eckel, M.D., a professor of medicine at the University of Colorado. In 1 tablespoon: 80 calories, 9g fat (2.5 saturated).
2. Olivio – It’s made with healthy olive oil, but yet there is no Mediterranean taste. It’s easier to spread than butter and it tastes slightly sweet and salty. In 1 tablespoon: 80 calories, 8g fat (1.5 saturated).
3. Move Over Butter – Butter is loaded with fat, but the buttermilk in this sub has little to no fat. It still has a light, buttery flavor. It contains more water than others so is not recommended for baking. In 1 tablespoon: 50 calories, 6g fat (1g saturated).
4. Bummel and Brown Spread Made with Natural Yogurt – Yogurt and vegetable oil combine to create a soft, slightly tangy smear with half the fat and calories of regular butter. Also not recommended for baking since there is not enough fat to bind cakes or breads. In 1 tablespoon: 45 calories, 5g fat (1g saturated).
5. Sunsweet Lighter Bake – Made from a blend of dried plums and apples, this mixture acts just the way a fat would, which keeps cookies, cakes and muffins moist. In 1 tablespoon: 35 calories, 0 fat.

Compensation for Ford executives ‘excessive and unjustified,’ says Gettelfinger

Detroit – The compensation announced recently for executives at Ford Motor Co. “is excessive and unjustified,” said UAW President Ron Gettelfinger. The company said that its top five executives received more than $60 million in total compensation in 2007.

“Our members at Ford agreed to substantial sacrifices in 2007 to help Ford survive so the company can rebuild and reinvest in the United States,” said Gettelfinger. “We did not sacrifice so that management could find a way to reward themselves with higher compensation.

“When we negotiated new agreements at Ford and other auto companies last year, we called on the companies to use the savings we achieved to reinvest in America and to deliver cost savings to consumers. We’re extremely disappointed that Ford has apparently chosen to go in a very different direction.

“By all accounts, our 2007 auto agreements closed the so-called “competitive gap” in labor costs between domestic manufacturers and their foreign-nameplate competitors,” said Gettelfinger. “But the competitive gap between U.S. auto executives and their Japanese counterparts remains huge – and it will become even larger as a result of the increases in executive compensation announced today.

“It will be interesting to see if the news media, which has put so much focus on the compensation earned by autoworkers, will now give equal focus to the compensation earned by auto executives.”

“Restructuring at Ford is still a work in progress,” said Bob King, who directs the Union’s Ford Department. “The company has a long way to go to retain sales, market share and the confidence of American consumers. There is no performance-based measure that can justify the huge monetary rewards announced today.

“An increase in executive compensation is exactly the wrong message at a time our members and our communities are suffering from the impact of restructuring, downsizing, plant closings and job loss in the auto industry,” said King. “We expect equality of sacrifice from all stakeholders in our industry. Our members will continue to speak out loudly and clearly about what is needed to rebuild our company and rebuild our communities.”

The Wise Person

Welcome to the new hires and to new Chaplain member Charlotte Hoskins from Utica. Saturday April 19th (11am-2pm) at Local 892 is the Community Day of Prayer. Prayer is for workers’ memorial, jobs, family, leadership, and themselves. Regional Chaplaincy Conference: May 10th at Region 1A on Telegraph in Taylor. National Day of Prayer: May 1st (9am-11am) at Cobo Hall (seats are $10). All invited to these events. International Chaplaincy Conference: June 2008 at Black Lake. Delegates appointed for this event. Pop can Fundraiser: Thank you for your support. Prayer Boxes: Submit requests and praise reports. Prayer: Dear Father, thank you for all you’ve done and will do for us. Cover us with protection and wisdom and understanding. Show us how to have peace, love, joy in our lives, especially during times of turmoil, tribulation, despair, and sorrow. Create in us a more perfect union and establish liberty and justice for all. Amen.

Prayer
Psalms 146:5-6 says “since his days are determined, the number of his months is with You; and his limits You have set so that he cannot pass. Turn your gaze from him that he may rest, until he fulfills his day like a hired man. For there is hope for a tree, when it is cut down, that it will sprout again, and its shoots will not fail. Though its roots grow old in the ground and its stump dies in the dry soil. All the days of my struggle I will wait, until my change comes. Should a wise man answer with windy knowledge...should he argue with useless talk...or words not profitable. You will hinder and guilt will teach your mouth and it will condemn you and your own lips will testify against you. Speak WISELY and Psalms 146:6 says that men shall speak of the power of your awesome acts and...toll of your greatness. Proverbs 9:12 says If you are wise, you are wise for yourself, and if you scoff, you alone will bear it.
